Frontend:

Introduction: Calling all front-end developers put forth your best design and build the internet you would like to see

About the events: A team can have a maximum of 2 members. The event will consist of two rounds

Round1 (40 min):

A preliminary round consisting of MCQ-type questions.
Will test one's basic knowledge of the internet and its protocols, web designing principles, HTML,CSS, JavaScript ect.

Rules:

1. A preliminary round consisting of MCQ type questions
2. Any suspicious malpractices will disqualify the team
3. Top 10 highest scoring teams will be selected for round 2
4. Details regarding the quiz platform will be emailed later to the team leader upon registering

Round 2:

This is a development based round to test your niche web development and design skills. The teams will have to design a website withing a given time span on any one of the topics which will be given.

The factors on which a particular website will be judge are:

·Creativity in terms of design
·Fulfilling all the requirements of the given problem statement
·Presence of fewer bugs
·Score obtained in Round 1 in case of a tie

Rules:

1. The time limit for the 2nd round is 3hrs.You have to submit your hosted website within the time
2. The topics and submission form will be emailed on the day of final
3. There is no restriction to the technologies, libraries and frameworks and minimum use of third-party npm packages
4. Using website builders like WordPress/Blogspot/Wix/ChatGPT/Any AI tools etc will result in immediate disqualification

5. Backend is not mandatory

6. You need to mandatorily host the website and provide the link in the submission form which will be given.

7. The website code should be publicly available on GitHub and need to submit the repository link in the submission form .

8. Top 3 teams at the end of the final will be rewarded

9. The decision of the jury will be considered as the final decision

10.We may change the rules according to the situation
